

Kerberos C64/C128 MIDI Flash Interface Quick Start Guide

1. Turn off your C64 or C128
2. Insert the cartridge into the cartridge port at the back of your C64/C128, on the right side:

3. Turn on your C64/C128. You should see the start menu:

```
Kerberos Menu V1.0 - Main Menu
S: Start from slot
E: EasyFlash start
T: Transfer from PC/Mac
C: Configuration
H: Hardware reset / Kerberos off
R: Reset to C64 BASIC prompt
M: MIDI test
A: About
```

4. Press the „S“ key to list all pre-installed programs, and then a number key to start a program, or press E to start the pre-installed EasyFlash program
5. Press the reset button at the left side of the cartridge to go back to the menu
6. For connecting a MIDI keyboard to use with Cynthcart or other MIDI programs, connect it with a MIDI cable to the MIDI-in connector at the left side. For uploading programs from a PC or Mac to the flash memory of the cartridge, connect MIDI-out of an USB MIDI adapter to MIDI-in of the cartridge.

For the PC/Mac program to transfer your own programs or games and to update the menu program, and for the detailed user's and developer's guide, visit
